PERSONAL PROJECTS

Enatega (Food Delivery Solution) - Ninnjas Code

- I worked as a full-stack developer on Enatega's project where the team and I delivered two main projects under the umbrella of Enatega(Enatega Single Vendor and Enatega Multivendor) Enatega is a food delivery solution mobile app for single and multivendor restaurants. I worked on React Native as well as on Node on the backend.

Ecommero - Ninjas Codes

- Ecommero is also another project of Ninjas Code which provides ready-made e-commerce single vendor mobile application a kind of starter kid. I worked as a full-stack developer on this project building the dashboard in React, mobile application in React Native, and the backend in Node.js under a tight deadline it was made possible that the project was completed under a month. I worked on most parts of the project.

LIMITLESS EBOOKS - CodesOrbit

- Limitless Ebooks is an ebooks listing websites where users can buy ebooks online

UVS Hospital Management System - CodeOrbit

- Developed management system providing dashboard where information of every entity related to hospital is stored for everyday hospital management tasks.(Node Js, MS Sql)

Audtix - CodesOrbit

- Developed mobile and web Api's of audio streaming application(Node Js, MySql)
